

Internet-Based Business-to-Business Electronic Commerce

By

- Jae-Pil Yang -

**A dissertation submitted in partial fulfillment of the requirements for
the degree of Master of Strategy and International Management**

**KDI School
of International Policy and Management**

1999

ACKNOWLEDGEMENTS

Many individuals have been very helpful in the completion of this dissertation. While there is not room enough to acknowledge everyone, I would like to mention a few individuals.

Dr. S.J.Lee provided valuable and insightful comments and have always encouraged me throughout the school course and progress of this research. Without his encouragement and insight, I would not have been able to complete my dissertation.

I thank the Marketing Department of POSCO and KDI School for giving me this academic opportunity. I would especially like to mention the enormous support, openness toward new ideas, and patience of my boss Mr. I.H.Oh and team fellows.

I would also like to thank Mr. Back, Mr. Jahng and Mr. Lee for providing their profound knowledge of Internet and electronic commerce. Their help made this research possible. And my special thanks also go to my old friend Mr. S. Y. Kim, who gladly helped correcting English wordings on a short notice.

Finally, I would like to thank my wife and twin babies for bearing patiently and supporting my work enthusiastically throughout this academic period.
